

1 INTRODUCTION

- 1.1. The purpose of this document is to define the San Francisco International Airport (SFO or Airport) Building and Structure Numbering Standards, as well as define what shall be considered as a building or structure. Numbering standards shall be utilized to ensure continuity of the Airport's building and structure numbering and to help maintain the integrity of the Airport's spatial data infrastructure.
- 1.2. The numbering convention will adopt the current numbering scheme in order to preserve existing building ID's yet also provide the opportunity to expand with future growth. Buildings are currently numbered in a clockwise sequence around the property, which is to remain in place with the addition of zones to provide a spatial structure to the numbering convention.
