

1.2 Scope of this Document

This document defines requirements for all CAD drawings created for or used by the Airport. These drawings are used throughout the planning, design, construction, operations, and maintenance phases of a facility or asset's lifecycle. These drawings also include CAD working documents that are exchanged internally at the Airport, or between the Airport and its consultants, agencies, the City and County of San Francisco, and other stakeholders. The requirements for these drawings, as documented in this Standard, apply to all consultants and staff responsible for creating or maintaining these drawings.
