

1.3 Intended Audience

The intended audience for this document includes Airport staff, as well as CAD technicians who work for consultants, subconsultants, and tenants to create or alter DWGs that are submitted to or used by the Airport. These individuals should have a thorough understanding of the requirements in this document and be able to meet them. Those who view and extract but do not change data in Airport DWGs may also wish to become familiar with the structure of drawing sets and the organization of data within them so that they can efficiently find the data that is most relevant to them. Airport Project Managers (PM) and consultant Project Managers who supervise projects that include DWG deliverables should also become familiar with the requirements described in this document.

Consultants and subconsultants should use this document to fulfill the obligations of Airport contract specifications and/or agreements. Tenants should use this document to fulfill tenant improvement obligations associated with Airport-approved work permits. If there are any discrepancies between this manual and an Airport contract, specification, or agreement, please contact your Airport PM or Lease Manager for clarification.
