

6.1 Airport Internal vs. External Distribution Policy

All GIS data owned and maintained by SFO is only to be distributed using PDF read-only format unless otherwise specified. Any information that is requested to be distributed online via interactive web mapping is regulated through an online secure system of Level 1 or 2 named users with appropriately granted rights to view, author, and publish data as determined by their necessary use of the data. All other digitally formatted data requires that the Airport Project Manager (SFO PM) have all external parties (Consultant, sub-consultant, tenant, airline, municipality, etc.) fill-out, sign, and return the official Airport Data Release Agreement to SFO GIS before distributing the data.
