

1.6 Revision History

This document has and will continue to evolve to meet the needs of the Airport, accommodate requests by consultants that are approved by the Airport and enable the use of new technologies. Following is a list of the versions of this document that have been published. It is the responsibility of those developing and maintaining Airport DWGs to use the latest version of this document. All drawings submitted in fulfillment of contractual obligations shall follow the most recent version of this document at the time of contract execution.

Table 1—Document Revisions

Revision Number	Date Published	Summary of Changes Made
1	May 2010	Initial version
2	April 2017	Detailed list of required layers, topology between objects, and SSI requirement were added
3	Feb 2018	Updated list of layers including those for the interior of buildings, special considerations for layer naming for security and utilities
