

4.2 Layers to Use

Only layers listed in Appendix E—with the appropriate status code added—may be used in Airport DWGs. The most appropriate layer for each object shall be selected from these lists. In some cases, specific business requirements may necessitate deviations from these layer names. These permitted layer name deviations are described in Appendix F. If additional layers are required, a change request form (provided in Appendix A) shall be submitted to the Airport for consideration. Layers not listed in Appendix E shall not be used without the Airport's written approval.
