

2.1.3 Conformed Model

A Conformed Set or Record Drawings is the final compiled set of drawings prepared by the Design Team disciplines reflecting the changes throughout the course of the bidding and construction processes documented thru addenda and contract modifications. They are usually drawn and compiled as a 'designer of record approved' set of on-site changes.

Each Design Team discipline will keep the model updated with the changes reflected by Record Drawings and provide the Airport with a Conformed Design Model by the end of the construction phase in a native Revit file format. Models exported in other file formats will not be accepted.
