5.2.5.2 Line Styles

Line Styles are defined in the SFO templates as project settings. System line styles used by certain Revit subcategories cannot be deleted or purged and remain with the out-of-box name. Custom line styles are defined in the SFO template. Any additional line styles shall be created by the BIM coordinator and named according to the following naming conventions.

[Line Weight]-[Line Style]

Line Weight: Line Weight number (1 - 16)
Line Style: Line Style Name

Examples:

1-Solid
3-Solid
5-Hidden
