1.5.2. Informative References

The following documents provide additional information that may help developers and users of Airport DWGs create, update and use the data they contain. Any requirements defined in these documents may be applied at users' discretion, but are not necessarily required and must not conflict with the requirements of this document. These documents include:

- San Francisco International Airport BIM Guide
- San Francisco International Airport GIS Standard
- San Francisco International Airport Building Level and Space Numbering Guide
- San Francisco International Airport Sheet Numbering Guidelines
- National Institute of Building Sciences' National CAD Standard (NCS), which can be found at: https://www.nationalcadstandard.org
- United States Army Corps of Engineers (USACE) CAD-BIM Technology Center's A/E/C CAD Standard, which can be found at: https://cadbimcenter.erdc.dren.mil/default.aspx?p=a&t=1&i=7
